SINCE 1873

TERRA

DESIGN: DIETIKER, 2017

The Terra folding 4-leg table combines an elegant design with maximum functionality. The frame is slightly offset laterally and offers consequently an intelligent folding mechanism, so that the tables are not only intuitively used, but can also be stacked using a minimum of space. The tables can be folded quickly and stored easily.

TECHNICAL DATA

CONSTRUCTION

Self-supporting frame made out of anodized aluminum profiles 35 mm x 35 mm.
The fitting with patented release mechanism allows smallest table sizes, low table heights and realizes little storage space requirement.
Smooth table foot lock realized by a self-adjusting sword segment with triple connection per segment.
Maintenance-free double bearing trigger mechanism.
The robust bearing bush (PA + 30 % glass fiber) including felt cover also serves as stacking devise.

TABLE TOP

Base panel SPAN 19mm, with HPL

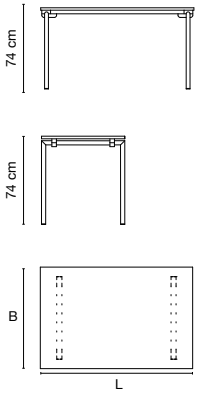

STEEL PARTS SURFACE TREATMENT

Chromed

GLIDES

Standard: Plastic
